

BOEF

ENGINEERING (PTY) LTD

**COMPANY
PROFILE**

Our Distinct Advantage

Precision & Quality

- We use state-of-the-art laser, CNC milling, rolling, and bending machines to deliver high-accuracy parts with tight tolerances.

Advanced Technology

- Our facility is equipped with the latest machinery, ensuring efficient production and top-tier craftsmanship.

Custom Solutions

- Whether you need prototypes, small batches, or large-scale production, we tailor our services to your exact specifications.

Experienced Team

- Our craftsman and technicians bring years of expertise in precision manufacturing, guaranteeing reliable results.

Fast Turnaround

- We prioritize efficiency without compromising quality, delivering projects on time and within budget.

Competitive Pricing

- High-quality machining and fabrication at cost-effective rates.

End to End Services

- From design consultation to final production, we provide comprehensive support for your manufacturing needs.

Our Capabilities

Laser & Plasma Cutting

Our Laser and Plasma Cutting services deliver precise, efficient, and high-quality results for a wide range of materials and project needs. Whether you're working with metals or custom components, our state-of-the-art equipment ensures clean edges, tight tolerances, and fast turnaround times.

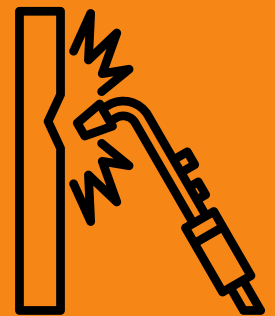

Brass | Copper | Steel | Stainless Steel | Aluminium

Laser Table Size: 4m x 2m | Plasma Table Size: 6m x 2m

Welding

We provide high-quality welding services, specializing in the fabrication, repair, and custom metalwork of steel, aluminum, and stainless steel components. Our skilled welders ensure strong, precise, and durable welds for residential, commercial, and industrial projects.

Rolling

Our Rolling services shape metal with precision and consistency, reducing thickness and forming curves or cylinders to meet your exact specifications.

Ideal for structural components, custom fabrication, and sheet metal applications, we ensure smooth finishes and accurate results every time.

Steel | Stainless Steel | Aluminium

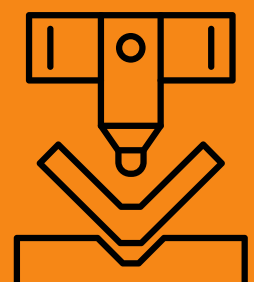

Roller 1: Up to 2m Wide x 8mm Plate Thickness x 3m OD

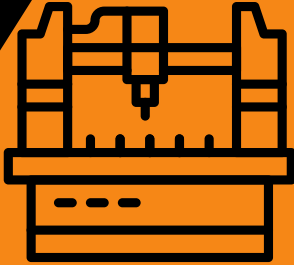

Roller 2: Up to 1.8m Wide x 16mm Plate Thickness x 3m OD

Bending

Our Bending service forms metal sheets and plates into the desired angles and shapes with precision and consistency. Using high-quality press brakes and expert techniques, we ensure clean bends, accurate dimensions, and reliable results for a wide range of fabrication needs.

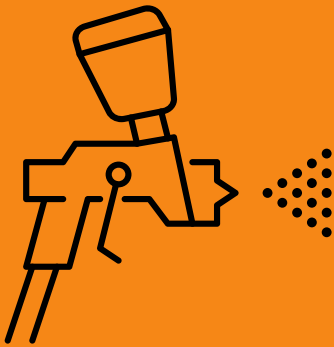

CNC Milling

Our CNC Milling services offer high-precision machining for complex parts and components across a variety of industries. Using advanced computer-controlled equipment, we produce accurate, repeatable, and finely detailed parts from a range of materials.

We deliver reliable results with fast turnaround times.

Wood | Brass | Copper | Steel | Stainless Steel | Aluminium

Table Size: 1.15m x 1.35m x 1.3 High

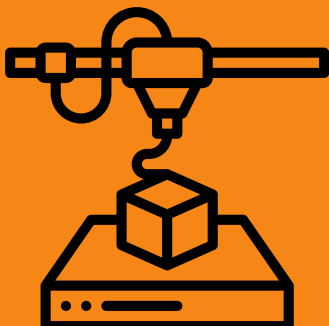

Powder Coating

We offer durable and high-quality powder coating services for metal surfaces, providing a smooth, long-lasting finish in a wide range of colors and textures. Ideal for both protective and decorative applications in industrial, commercial, and custom projects.

Sandblasting

We offer sandblasting services for surface preparation, utilizing high-pressure media to effectively remove rust, scale, old coatings, and surface contaminants. Our process ensures optimal surface profiling for improved adhesion in coating, painting, and welding applications across industrial, automotive, and structural projects.

3D Printing

We offer custom 3D printing services to bring your ideas to life—whether it's a prototype, a replacement part, or a unique design. With a variety of materials and colors available, we create high-quality, detailed prints tailored to your needs.

Vision

Our Vision is to be a leading provider of innovative engineering solutions, delivering high-quality precision manufacturing through cutting-edge technology and unmatched expertise. We strive to build long-lasting partnerships with our clients by continuously exceeding expectations and driving progress across industries

Mission

Our Mission is to deliver exceptional engineering solutions that meet the highest standards of quality, precision, and reliability. We are committed to using innovative technologies and a customer-focused approach to provide customized, cost-effective solutions that drive success for our clients across all industries.

INDUSTRIES WE SERVE

Manufacturing & Industrial

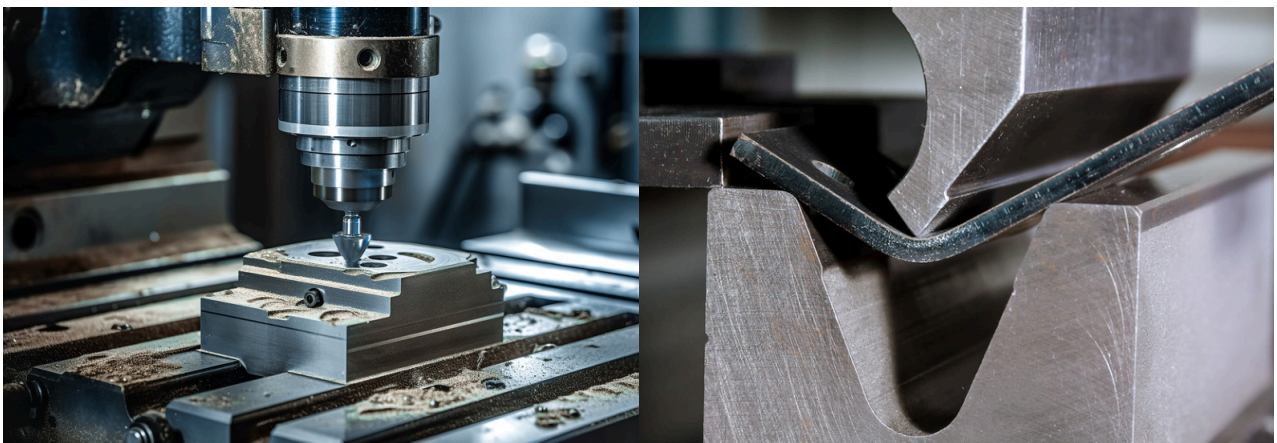

Automotive & Transportation

Construction & Infrastructure

Power-generations & Petroleum

Retail & Commercial

Custom & Prototype Engineering
